LAVI 

Fernas Food;

Since 2014, Fernas Food has been producing high-quality food products using advanced technology in a 27,000 square meter facility area located in Batman, Turkiye.

Our facility includes a fruit juice concentrate production line, multiple fruit juice filling stations, and cold storage warehouses. In cold storage warehouses, fresh and frozen fruits and vegetables are stored, sorted, and packaged.

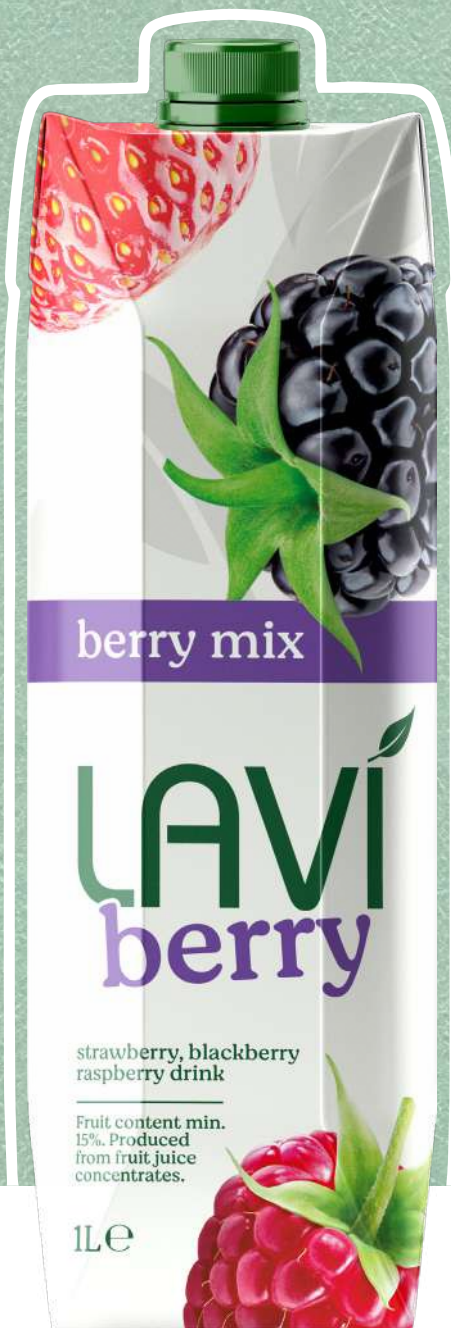

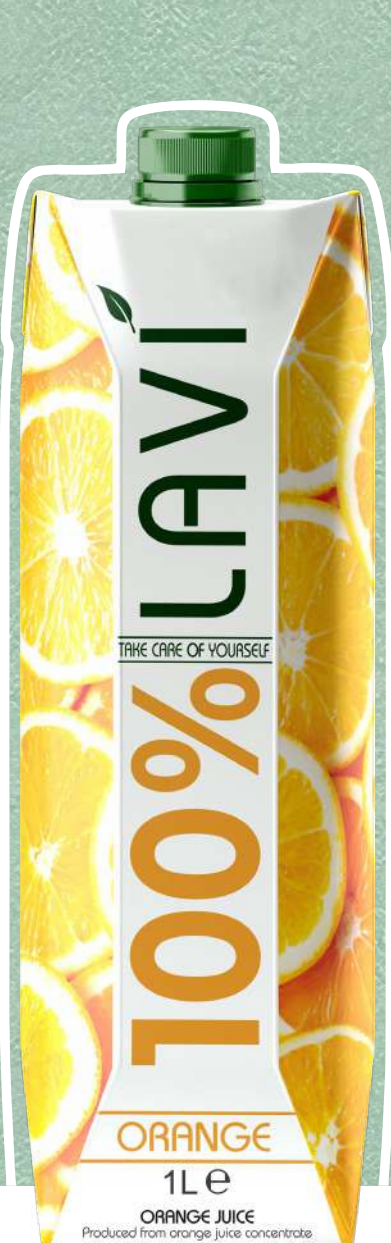

We harvest fruits and vegetables from over 10,000 decares of agricultural land in Batman, Siirt, and Eskişehir. These products are then sent to our cold storage warehouses for processing and preparation for consumption.

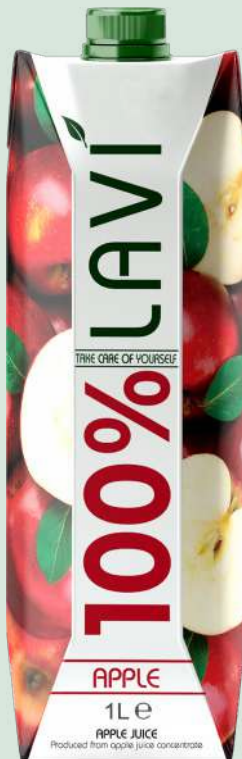

Through our extensive operations, we export our products to more than 40 countries.
